Quapas! Cat litter

World's first circular cat litter

What does that mean?

What exactly are co-products? Co-products are products that are left over from the processing of crops, e.g. for consumer goods and construction materials. Instead of throwing these products out, Quapas! strives to find new applications for them. Such as this cat litter!

Our highly absorbent cat litter is made from malt, citrus molasses and rye residue. This means the cat litter effortlessly prevents nasty odors, does not stick to your cat's sensitive paws and is fully compostable.

In other words: your cat + our cat litter = purrfect.
